

# Air Pressure Butt Welding Equipment 380V Pneumatic Touch Welding Machine

## **Basic Information**

Place of Origin: Guangdong, ChinaBrand Name: Jin Hongxiang

Certification: CE
Model Number: JT-35
Minimum Order Quantity: 1 set
Price: Negotiable

Packaging Details: Export wooden case packagingSupply Ability: 100 Set/Sets per Month

## **Product Specification**

Product Name: Air Pressure T-welder

• Applicable Industries: Kitchen And Bathroom Hardware Products,

Lighting Processing

Weight (KG): 180KGVoltage: 380V

• Feature: Slide Rail Push, Push More Flexible.

Adjustable Cylinder Control Stroke, More

Convenient Welding

Advantage: With Sufficient Power, The Welding Is More

Firm And Beautiful.

• After Warranty Service: Video Technical Support, Online Support

• Port: Shenzhen

• Highlight: Air Pressure Butt Welding Equipment,

Pneumatic Butt Welding Equipment, 380V Touch Welding Machine

## **Product Description**

## Air pressure butt welding machine

#### Nickname

JE-35 air compression butt welding machine,

Circle butt welder,

Square butt welding machine,

Butt welding machine,

Ball butt welder,

Taiwan butt welding machine,

Precision butt welding machine,

Fast butt welding machine,

JE-50 butt welding machine,

Docking machine,

Touch welder,

Pneumatic butt welding machine.

### Capability feature

- 1. It can realize clamping, flattening and butt joint in the welding process, and can also discharge twice and three times to meet your different needs
- 2. The equipment has ingenious design, simple operation and easy to master.
- 3. Pneumatic lever type pressurization is adopted, which has greater clamping force Ensure that there is no slip during working welding and the welding performance is more stable.
- 4. The movable sliding seat is guided by double guide rails and pushed by adjustable cylinders, High precision, good damage resistance, smooth and stable movement; Ensure the consistency of butt welding interface of workpiece.
- 5. Good molding The butt welding process is simple, with less shortening and burr of weldments, which is conducive to simplifying the subsequent process.

#### **Basic structure**

1. Increase and thicken conductive brass, wear-resistant alloy electrode and red copper strip, which are the key to ensure the export of current. If these same accessories meet the standard, they can have strong welding ability, good welding effect, longer machine durability and faster welding speed.

Technical parameters:					
Model	Rated power	Input voltage	weight	Welding ability	Packing size
JE-35	35KVA	380V/50HZ	180kg	φ8+φ8ММ	110*80*115CM
JE-50	50KVA	380V/50HZ	250kg	ф10+ф10ММ	110*80*115CM
